

## **SHEEP WORRYING**

It is an offence to allow a dog to worry sheep. Worrying includes attacking or chasing sheep and, in some circumstances, farmers are legally entitled to shoot dogs if they are endangering their sheep. Find out more below in the 'Staying legal' sections below. It is vital that you keep your dog on the lead around livestock, even if you can usually trust it to come to call. If you live in or near a farming area, you must make sure that your dog cannot escape from your property, as it may find its way onto land containing sheep.

If a dog worries sheep on agricultural land, the person in charge of the dog is guilty of an offence. The Act considers sheep worrying to include attacking sheep, chasing them in a way that may cause injury suffering, abortion or loss of produce or being at large (not on a lead or otherwise under close control) in a field or enclosure in which there are sheep.

### **The Scottish Outdoor Access Code**

The Scottish Outdoor Access Code (SOAC) offers guidance for people enjoying the countryside with their dogs and says: "In exercising access rights, you must keep your dog(s) under proper control. You must also ensure that your dog does not worry livestock."

The Scottish Outdoor Access Code says 'proper control' means different things in different situations, but when around sheep you should:-

- Not take your dog into a field where there are lambs. Go into a neighbouring field or onto adjacent land. In open country, keep your dog on a short lead (2 metres or shorter) when there are lambs around and keep away from them.
- Keep your dog on a short lead or under close control if you need to go into a field where there are sheep. The SOAC defines 'under close control' as close at heel and responsive to your commands. Stay distant from the sheep.
- Keep your dog under close control in more open country where there are sheep and stay away from them.
- The SOAC reminds dog owners that in some cases a farmer has the right to shoot a dog that is attacking their livestock.
- If you are handling a group of dogs, make sure that they do not cause alarm to livestock.
